National Guard Medic Fact Sheet

- All medics, both Air and Army, are required to maintain a current National Registry EMT license.
- They are certified in BLS and some in ACLS and/or PALS, depending on job role.
- All must complete a 48-hour annual refresher for didactic and skills certification.
- Skills are varied and may include: Obtaining Vital signs, phlebotomy, IV and IO access, performing 12-lead EKG's, medication administration (PO, IV, PT, INH…).
- Work in all units within the hospital.
- All have annual HIPPA training, current immunizations for healthcare providers, and secret security clearance (background checks).
